SYSTEMS & CONTROL LETTERS

Author Index Volume 34 (1998)

(The issue number is given in front of page numbers)

Aihara, S.I., Consistency property of extended least-squares parameter estimation for stochastic diffusion equation (5) 249–256
Anderson, B., see N. Linard (5) 265–271
Astolfi, A. and **A. Rapaport,** Robust stabilization of the angular velocity of a rigid body (5) 257–264

Bartlett, P.L. and **S.R. Kulkarni,** The complexity of model classes, and smoothing noisy data (3) 133–140
Bartlett, P.L. and **M. Vidyasagar,** Introduction to the special issue on learning theory (3) 113–114
Borkar, V.S., Ergodic control of partially observed Markov chains (4) 185–189

Campi, M.C., see M. Prandini (4) 177–183
Campi, M.C. and **P.R. Kumar,** Learning dynamical systems in a stationary environment (3) 125–132
Comeau, A.R. and **N. Hori,** State-space forms for higher-order discrete-time models (1–2) 23– 31

Dahlén, A., A. Lindquist and **J. Mari,** Experimental evidence showing that stochastic subspace identification methods may fail (5) 303–312
Dahleh, M.A., see M.W. McConley (1–2) 77– 83
Dai Pra, P., L. Meneghini and **W.J. Runggaldier,** Explicit solutions for multivariate, discrete-time control problems under uncertainty (4) 169–176
Dayawansa, W.P., see B. Ho-Mock-Qai (1–2) 43– 53
De Bruyne, F., see N. Linard (5) 265–271
De Moor, B., see B. De Schutter (1–2) 63– 75
De Schutter, B. and **B. De Moor,** The Linear Dynamic Complementarity Problem is a special case of the Extended Linear Complementarity Problem (1–2) 63– 75
Deistler, M., see W. Schachermayer (1–2) 101–104
Di Masi, G.B. and **Ł. Stettner,** Bayesian adaptive control of discrete-time Markov processes with long-run average cost (1–2) 55– 62
Dirr, G. and **U. Helmke,** Continuity properties of balanced realizations (4) 217–224
Dulęba, I., On a computationally simple form of the generalized Campbell–Baker–Hausdorff–Dynkin formula (4) 191–202

Engel, K.-J., On the characterization of admissible control- and observation operators (4) 225–227

Feron, E., see M.W. McConley (1–2) 77– 83

Helmke, U., see G. Dirr (4) 217–224
Hernández-Hernández, D. and **S.I. Marcus,** Corrigendum to "Risk Sensitive Control of Markov processes in countable state space" [Systems Control Lett. 29 (1996) 147–155] (1–2) 105–106
Ho-Mock-Qai, B. and **W.P. Dayawansa,** Nonsmooth simultaneous stabilization of nonlinear systems: An interpolation method (1–2) 43– 53
Hori, N., see A.R. Comeau (1–2) 23– 31
Hunt, L.R., V. Ramakrishna and **G. Meyer,** Stable inversion and parameter variations (4) 203–207

Ilchmann, A. and **H. Logemann,** Adaptive λ-tracking for a class of infinite-dimensional systems (1–2) 11– 21
Inaba, H., see N. Otsuka (1–2) 33– 41
Isidori, A. and **W. Lin,** Global L_2-gain design for a class of nonlinear systems (5) 295–302

Johansen, T.A. and **E. Weyer,** On convergence proofs in system identification – a general principle using ideas from learning theory (1–2) 85– 92

Karimi, A. and **I.D. Landau,** Comparison of the closed-loop identification methods in terms of the bias distribution (4) 159–167
Kawamura, Y., Direct construction of LQ regulator based on orthogonalization of signals: Dynamical output feedback (1–2) 1– 9
Kazantzis, N. and **C. Kravaris,** Nonlinear observer design using Lyapunov's auxiliary theorem (5) 241–247
Kravaris, C., see N. Kazantzis (5) 241–247
Kulkarni, S.R., see P.L. Bartlett (3) 133–140
Kumar, P.R., see M.C. Campi (3) 125–132

Lam, J., see W.-Y. Yan (5) 273–280
Landau, I.D., see A. Karimi (4) 159–167
Lin, W., see A. Isidori (5) 295–302

Elsevier Science B.V.

Lin, Z., Semi-global stabilization of discrete-time linear systems with positions and rate-limited actuators (5) 313–322
Linard, N., B. Anderson and **F. De Bruyne**, Coprimeness properties of nonlinear fractional system realizations (5) 265–271
Lindquist, A., see A. Dahlén (5) 303–312
Liu, W.Q., V. Sreeram and **K.L. Teo**, Model reduction for state-space symmetric systems (4) 209–215
Logemann, H., see A. Ilchmann (1–2) 11– 21

Man, Z., see Y. Wu (5) 281–287
Marcus, S.I., see D. Hernández-Hernández (1–2) 105–106
Mari, J., see A. Dahlén (5) 303–312
McConley, M.W., M.A. Dahleh and **E. Feron**, Polytopic control Lyapunov functions for robust stabilization of a class of nonlinear systems (1–2) 77– 83
Meneghini, L., see P. Dai Pra (4) 169–176
Meyer, G., see L.R. Hunt (4) 203–207

Otsuka, N. and **H. Inaba**, A note on robust disturbance-rejection problems for infinite-dimensional systems (1–2) 33– 41
Owens, D.H., see J. Wood (5) 289–293

Prandini, M. and **M.C. Campi**, A new recursive identification algorithm for singularity free adaptive control (4) 177–183

Ramakrishna, V., see L.R. Hunt (4) 203–207
Rapaport, A., see A. Astolfi (5) 257–264
Rebarber, R. and **S. Townley**, Generalized sampled data feedback control of distributed parameter systems (5) 229–240
Rogers, E., see J. Wood (5) 289–293
Runggaldier, W.J., see P. Dai Pra (4) 169–176

Schachermayer, W. and **M. Deistler**, The set of observationally equivalent errors-in-variables models (1–2) 101–104
Sontag, E.D., A learning result for continuous-time recurrent neural networks (3) 151–158
Sontag, E.D., Comments on integral variants of ISS (1–2) 93–100
Sreeram, V., see W.Q. Liu (4) 209–215
Stettner, Ł., see G.B. Di Masi (1–2) 55– 62

Teo, K.L., see W.Q. Liu (4) 209–215
Townley, S., see R. Rebarber (5) 229–240

Vidyasagar, M., see P.L. Bartlett (3) 113–114
Vidyasagar, M., An introduction to some statistical aspects of PAC learning theory (3) 115–124

Weyer, E., see T.A. Johansen (1–2) 85– 92
Wood, J., E. Rogers and **D.H. Owens**, Minimum lag descriptions and minimal Gröbner bases (5) 289–293
Wu, Y., X. Yu and **Z. Man**, Terminal sliding mode control design for uncertain dynamic systems (5) 281–287

Yan, W.-Y. and **J. Lam**, On computation of the stability radius for nonlinearly structured perturbations (5) 273–280
Yu, X., see Y. Wu (5) 281–287
